How to read this guide

The walkthrough

Part 1 follows Torn City roughly in the order you reach each place, sorted by the level of the wild Tornies there. Part 2 does the same for Ravenport. Each place lists every Tornie you can meet, how you meet it, its level and the chance of meeting it.

Day / Night are the odds for each kind of encounter at that time of day. Some Tornies only come out at night (the clock in the game runs day, evening, night and morning). A dash means "not at this time".

Grass / Cave / Wild means walking around. **Old Rod, Good Rod, Super Rod** are fishing: each rod has its own list, and the odds are for that rod.

Weather changes the odds a little: rain doubles the chance of Water Tornies, snow of Ice Tornies, and fog of Spirit and Shadow Tornies.

The Tornie Log

Part 3 has a full entry for every Tornie, in number order.

Stats are base stats: HP, Power (physical attack), Guard (physical defence), Focus (special attack), Resolve (special defence) and Speed.

Weak to lists the types that hit it for double damage (×4 if both its types are weak). **Resists** takes half (or a quarter). **Immune** takes no damage. **Strong vs** lists the types its own-type moves hit for double damage.

Moves are the moves it learns by levelling up, with the level. The coloured dot is the move's type.

Ranked Tornies are rare colours: any wild Tornie has a 1 in 400 chance.

★ marks Legendary, APEX and Event Tornies.

Type chart

Read across from the attacking move's type. 2 = double damage, ½ = half, 0 = no effect, blank = normal. Dragon and Fairy arrive with Ravenport.
